# WHAT IS INFI CDEX?

Inverted Investment is a prestigious organization founded on the backbone of INFI holders. Our organization is driving forward 13 innovative projects, with the first being INFI CDEX - a cutting-edge digital trading platform that encompasses all.

Inverted Investment is transforming the financial industry with INFI CDEX, a state-of-the-art digital trading platform. Our platform is distinguished by its unparalleled stability, transparency, decentralization, and top-notch security. It is powered by our self-developed protocol, SbSe (Self-builder Smart ecosystem), which seamlessly integrates the digital world with various sectors like food and beverage, business, real estate, trade, and pharmaceuticals.

Our ultimate goal is to implement the SbSe Protocol within an energy-efficient and cost-effective digital WEB4-based payment infrastructure. This innovative framework aims to minimize waste and ensure financial benefits for both consumers and businesses. All of this will occur within our exclusive INFI network, a secure and independent ecosystem.

At Inverted Investment, we are led by a team of dynamic and highly qualified professionals with extensive experience. Along with INFI CDEX, we will be introducing a series of 13 exceptional projects, revolutionizing the industry one step at a time!

# INFI CDEX advantages

Our platform provides an appealing opportunity for INFI holders to receive attractive rewards and offers a unique proposition for projects to list for free, generating passive income for their communities through the ©SbSe Protocol. Our topmost priority is safety and security, and we are committed to providing our clients with a reliable and secure trading environment. Our advanced cybersecurity measures ensure the utmost protection of your assets. Furthermore, effective liquidity management and prompt intervention in cases of fraud or scam assure investors safety. The SbSe PFP (SbSe Funding Pool) provides transparent access to the Inverted Investment profit, enabling INFI holders to benefit from monthly returns. Our web3-based wallet ensures the highest level of decentralization, eliminating the need for us to store your wallet keys or funds. This feature provides maximum freedom while keeping your assets secure. You can rest assured that we prioritize your security above everything else. The INFI CDEX launch will take place on the Polygon network, with plans to migrate to the INFI network in 2024. We invite you to join us on this journey to revolutionize decentralized trading.

# WHAT IS INFI ?

As an INFI holder, you possess a stake in Inverted Investment. INFI is the primary cryptocurrency used within the ecosystem, governed by the ©SbSe Protocol.

# INFI advantages

## Maximize Your Earnings as an INFI Owner

At INFI, we value our owners and want to reward them for their loyalty.

That's why we offer a generous 60% share of Inverted Investment's monthly profits to INFI owners. You'll receive 50% USDT and 10% Bitcoin, paid out monthly like clockwork. Remember, the return on your investment is closely related to the amount of INFI you allocate and stake. Please be aware that the staking period is limited to 24 months, and the minimum stake is 10 INFI, while the maximum is 12,000 INFI. If you have more than 12,000 INFI, please use an additional wallet.

# Invention of the @SbSe Protocol

**SBSE**  
**PROTOCOL**

The self-builder smart ecosystem is managed by the exclusive @SbSe Protocol, which oversees the entire system.

The @SbSe Protocol can connect the digital world to various industries such as food and beverage, real estate, leisure, business, export, and pharmaceuticals.

Our primary aim is to transform the @SbSe Protocol into a digital payment system based on WEB4 technology.

# Invention of the @SbSe Protocol

## SBSE PROTOCOL

The objective of this transformation is to develop an energy-efficient and cost-effective system that reduces waste while creating financial incentives for both clients and consumers.

Implementing a Cost-Effective Work Scheme as a Reward System Across Multiple Companies

To realize our vision, we've curated a team of proficient, qualified, and dynamic experts devoted to implementing and advancing the INFI network.

# What sets us apart from other CEX or DEX platforms?

While KYC and Audit are undoubtedly essential, they alone cannot make up for any losses incurred. Therefore, our liquidity management system is of utmost importance in preventing fraudulent activities and scams, as well as ensuring fair compensation for our investors.

Our trading environment boasts of transparency and safety, thanks to our robust cybersecurity measures. The @SbSe PFP also enables us to make our inverted investment profits visible to everyone.

Our system is fully decentralized, providing you with the highest level of freedom and protection. We do not store your wallet keys, crypto assets, or funds, ensuring maximum security and privacy.

We have created a unique ecosystem governed by our proprietary @SbSe Protocol. This protocol automatically rewards INFI holders by distributing 60% of the monthly profit generated through Inverted Investment in USDT and BTC.

SbSe Protocol Funding Pool is offering a seamless way for projects to list their opportunities, with the added incentive of community rewards in USDT. Listing on INFI CDEX is free and safe

Our @SbSe Protocol is designed to prevent price manipulation and volatility, thereby promoting equitable access for all. In line with our incentivization model, we have instituted a maximum INFI allocation per wallet, creating opportunities for individuals who may not have significant investment capital but wish to earn a stable passive income.

# INFI Tokenomics

# The staking and trading agreement

## 24 months staking period only

To qualify for passive income, the staking period is 24 months.

## Unstaking

Withdrawing your stake before the staking period ends will result in a 50% penalty fee, which will be deducted from the unstaked amount and directed into @SbSe Protocol Funding Pool

## The INFI allocation

Individuals can generate passive income from their INFI allocation, which must range between a minimum of 10 INFI and a maximum of 12000 INFI.

## Trading

Trading fees for @SbSe Protocol will be deducted from the trading amount and directed towards the @SbSe PFP.

## Passive income

60% of the Inverted Investment profit is distributed monthly, with 50% in USDT and 10% in BTC.

## Free token allocations from Inverted investment projects

We have a total of 13 innovative projects. INFI holders are eligible for a maximum of \$1700 worth of token allocation, which is granted free of charge, with a 12-month vesting period.

## Extra bonus while re-stake

INFI holders will receive an estimated "bonus" and additional funds from us if they opt to restake their allocation for another 24-month period before the staking period ends.

**Benefits for  
INFI holders  
(subject to a  
24-month lock  
period).**

# Beware of scammers

## No live chat support

Please be advised that we do not operate any customer live support. If someone contacts you pretending to be us, it is a scam.

## Questions?

If you require assistance, please do not hesitate to contact us at [support@infimultichain.com](mailto:support@infimultichain.com). We will promptly respond to your inquiry.

## Keep your seed phrase and your personal data safe

To prevent fraud, refrain from sharing your seed phrase or personal information. Be cautious of scammers requesting this information.
